

Kate Timmerman

Kate Timmerman is interested in work that is socially and personally transformative.

The content of her work examines the creative and destructive relationships we have with one another and the earth. It appeals to her to engage and include the audience through the character of the work.

Blue School black background

Formally, she chooses to explore the physicality of materials (wax, pigment, wood, fibers, lead and steel) as it supports themes of ritual, memory, reflection and turbulence.

Timmerman is a mixed media artist living in Phoenix, actively engaged in her community and a member of eye lounge, a contemporary artspace and artist collective.
